

Protect your business computers with

Gatekeeper

An e-mail anti-spam and virus protection service for
small and medium enterprises.

Are you tired of receiving unsolicited emails and viruses?

Protect your business computers with Gatekeeper, a sophisticated software solution which uses a combination of methods to block the vast majority of unsolicited emails and reduces the risk of viruses for businesses with five or more users.

Gatekeeper provides:

- | | |
|------------------|---|
| Time Efficiency | - Unsolicited emails are removed automatically saving you valuable time. |
| Cost Savings | - Protecting your computer will reduce the chance of costly computer repairs. |
| Healthy Computer | - Your IT network will operate quickly and smoothly with Gatekeeper enabling five plus users to carry out their work efficiently. |

How Gatekeeper works for your business:

- | | |
|---------------------|---|
| ✓ Greylisting: | - Gatekeeper maintains a dynamic list of e-mail senders and recipients which eliminates approximately 60-70% of unsolicited messages. |
| ✓ Active Scanning: | - Gatekeeper examines e-mails for known spam content, which eliminates 20-25% of unsolicited messages. |
| ✓ Basic Validation: | - Gatekeeper automatically checks your e-mails for validity and removes a further 1-2% of unsolicited messages. |
| ✓ AntiVirus: | - Gatekeeper checks your e-mails for harmful viruses which account for around 1% of all e-mails. |

Benefit from Gatekeeper in any of the following flexible ways:

- | | |
|---|---|
| Remotely (with either indirect or direct delivery): | - Spam and viruses are eliminated. Remaining e-mails are sent directly to either your mailbox or mail server. This is carried out remotely using our systems. |
| Local Service: | - A dedicated Gatekeeper server is installed on-site for businesses with high volumes of e-mail, or users who require greater protection. |
