

Skip Manager helps you manage your Skip Hire
& Waste Management operations.

Skip Manager

Computer system designed to make your life easier.

In need of a software package that can effectively track and monitor the hire of your skips?

Skip Manager is a bespoke computer system designed to enable you to manage the hire of your skips more effectively. From the initial bookings, hire, tracking and collections to credit control. Easily identify which skips have been hired out and the ones that should be ready for collection.

Skip Manager provides:

- Better Information** - The software manages all customer details and skips hired out. Staff can locate any information with just a few keystrokes - giving better information and speedier operations.
- Effective Customer Management** - New customer – no problem. Just enter all the order details and the customer record is created automatically and easily retrieved when they call back with their next order. Simplified operations and improved efficiency means lower costs.
- Improve Productivity** - The system covers the full hiring cycle: from taking the phone call, identifying returning customers & their previous orders, taking the booking, assigning drivers / lorries, printing delivery tickets & collection notes, invoices for trade / credit customers (can be linked to Sage Accounts), credit control and simplified skip collections & exchanges. Improved data entry – fewer keystrokes needed to enter conventional information.

Reduces unnecessary lorry trips – highlights other skips that are near to drop-off points, which may be ready for collection on the return trip. Multi-user and multi-company operations for the larger organisations.
- Professional Organisation** - Be the professional and let staff handle customer calls with full details at their fingertips. Skip Manager also improves staff data entry to produce better and professional looking documents. Effective management means that skips are accountable and you will know where each skip is, at any given time. This means that skips are less likely to go missing, ensuring the skip is chargeable every day it is out. Average hire-out periods are controlled and reduced, resulting in better availability of skips for hire. This delivers a far greater return on your investment in the skips.

Skip Manager works for you:

- ✓ **Manage Bookings** All skips are entered onto the system so that they can be hired out and tracked according to customer, length of time and location.
- ✓ **Dispatch Manager** For larger operations, staff can allocate pending deliveries and collections to drivers and lorries for effective management.
- ✓ **Technical Support** Full technical backup is provided to suit your needs and also remote access for fast problem solving in addition to free updates.
- One System - Better Working** Skip Manager has been designed for you to manage all operations in a simple to use, effective and professional computer package for all skip hire businesses.
